## Seat - The pressure relieving positioning cushion

Seat All Produktdatablade 2026 v1 (Seat-EN)

## Product description

Seat cushion, extra strong. Pressure distribution for the mitigation of pressure sores. Standard wheelchair size. Max 150 kg.

The cushion is static and is to be used for the prevention of pressure sores as well as pressure ulcers stage 1 and 2.

The ergonomic design of the cushion ensures stability without hindering the patient's movements.

Even with the slightest movement, the cushion will stimulate the microcirculation of the skin, which optimises circulation.

The cushion can be used for effective prevention and treatment of pressure sores on the most exposed areas such as hips, elbows, back, etc.

These qualities makes Seat All<sup>®</sup> an optimal positioning cushion when the patient needs a comfortable and supporting cushion.

Seat All<sup>®</sup> is made of non-woven material, which makes the cushion soft, skin-friendly, heat and moisture absorbent, comfortable and elastic.

## Advantages

- Designed for the prevention and treatment of pressure sores in the most exposed areas such as heels, hips, elbows, shoulders, back, etc.
- The cushions are multi-functional which means that the same product can be used for many different positions, optimising the prevention and treatment of pressure sores.
- Single-use ensures high hygiene.
- Simple and easy to use. Seat All<sup>®</sup> is inflated prior to use and adapted according to the individual's anatomy and needs.
- Good comfort.
- Soft, skin-friendly, heat and moisture-absorbent material.
- Space saving in the depot and liberating staff resources.
- Delivered in clean, sealed and slim packaging incl. inflation device.
- Tested and approved in accordance with ISO 10993-10:2010 skin irritation and sensitisation.
